(54) INTEGRAL SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To provide an integral system capable of quickly acquiring information related with enterprise activities and evaluating the enterprise on the basis of the information.

SOLUTION: A task system 1 operating on a server 1 is provided with a general account processing part 111, an accounts receivable processing part 112, an accounts payable processing part 113, an order reception management processing part 114, a purchase management processing part 115, and an inventory management processing part 116 so that the unitary management of data related with tasks can be performed by an integral data base 101. Also, the data on the integral data base 101 are updated generally in real time. An evaluation system 2 receives prescribed evaluation data 102 from among the data managed by the integral data base 101, and performs evaluation processing related with the target enterprise on the basis of the data, and outputs enterprise evaluation result data 231 and transaction evaluation result data 232. A loan judging part 302 provided in a loan system 3 performs loan judgment processing according to those data.
